

KAL Silicon Technologies eNews

Take a look at our 0.18um, 0.13um and 90-45nm Service!

KAL is offering Fujitsu/ TSMC /VIS fabrication service & design service including IP offering (physical and digital) as part of ASIC business model or manufacturing model.

Our service includes Spec/RTL/ Netlist /GDSII entry till mass production including assembly and test for high end flip chip devices.

Manufacturing services may include wafer fabrication only and assembly + test.

We bring added value with collaboration of top tier and cost effective partners in parallel to our supply chain services and experience.

Large proven IP offering including ARM7/9/11 and physical IP such as SATA, HDMI, DDR2/3, USB, PCIe, XAUI and MIPI, cut NRE cost!

Experienced team and well established relationship with the Fabs bring low risk and secure project lead time even for 50M gate ASIC.
